For Immediate Release:

ICC Global Leverages Peak 10's Services for Continued Expansion

July, 6 2011

ATLANTA - Peak 10 Inc., a managed services and cloud provider with world-class data centers, announced today it is delivering premier data center services to ICC Global Hosting, a provider of virtualized desktop and application hosting services for commercial enterprises, schools, healthcare providers, manufacturers and software vendors. Through hosting services made possible by Peak 10's enterprise-class data center campus in Atlanta, ICC Global will enjoy an increased level of scalability and the flexibility to grow without restriction from limited facility infrastructure or capacity.

"We chose Peak 10 because of its excellent customer service and its ability to substantially support our growth process. By employing its services, we are able to reduce our operating costs and pass these cost savings on to our customers," said Mark Moeller, the vice president of business development at ICC Global. "With Peak 10, we also have the option to implement virtual servers or engage one of Peak 10's secondary sites in the future for elasticity and redundancy."

ICC Global provides K-12 school districts and commercial enterprises across the United States with Hosted Virtual Desktops as a subscription service. The virtual application hosting affords customers a choice between Software as a Service (SaaS) applications and Platform as a Service (PaaS) applications. These unique offerings eliminate the need for hardware upgrades, provide centralized management, and both control and extend application life and delivery.

"By utilizing our data center services, ICC Global is positioned for rapid growth due to its ability to more easily deliver on-demand options to customers," said Matt Searfoss, the vice president and general manager of Peak 10 Atlanta. "As with all of our clients, we focus on delivering strong engineering and outstanding customer care to ICC Global, providing it with the security, reliability and quality of service for which Peak 10 is known."

Peak 10 Atlanta's cloud, managed IT and data center services improve performance and availability, lower costs and maximize internal resources for customers while keeping their valuable information technology assets close to the business. The company combines its secure, private network and enterprise-class data centers with world-class engineering and support to serve market-leading companies nationwide. As a managed services leader, Peak 10 offers a wide range of technology solutions including

cloud, virtualization and managed hosting services in a cost-efficient and reliable platform for its customers. The company owns and operates data centers in 10 key markets.

About ICC Global Hosting

ICC Global Hosting is the leading virtual desktop hosting company providing desktops as a service in a cloud computing environment. ICC utilizes the best technology vendors in its state-of-the-art hosting centers. Customers enjoy the benefit of desktops with consistent performance, the latest software versions and patches, and increased data security. Its cloud computing delivery methodology allows its customers to move their desktop computing expenses from a CapEx to an OpEx expenditure which reduces their overall costs. ICC has a tradition of excellence in support and has proudly served the education and commercial markets for the past 26 years. For more information, please visit www.iccglobalhosting.com.

About Peak 10 Inc.

Peak 10 is a managed services and cloud provider with world-class data centers. It delivers scalable, economical and reliable solutions for hosting and managing complex information technology infrastructure. Peak 10 delivers exceptional results with flexibility, responsiveness and accountability. The company's dedicated team embraces the industry's evolving technologies by adopting and tailoring solutions for cloud and virtualization technologies as part of its robust managed services offering.
